

SHORE TIE GROUND ELECTRICAL SAFETY - READ

Members,

For effective preventive maintenance, all members should be disconnecting and inspecting connections at a minimum of once per year. We will include this action in your annual vessel seaworthiness check.

Please inform our Maintenance Supervisor, Mike Stone or Bob Demers at 321-494-7453, Tue - Sat, 9 am - 4 pm or via e-mail @ pafbmanateecovemarina@gmail.com when you intend to stop by, a marina member should be present in order to remove corrosion.

Please e-mail Mike Stone or Bob Demers if you would like our maintenance staff to check your shore tie for you.
